## REPORT ON HUMAN VALUES

Human values are the virtues that guide us in considering the human element when we interact with other human beings. They are our feelings for the human essence in others. It includes both what we expect others to do for us and what we aim to give to other human beings. These human values give the effect of bonding, comforting and reassuring.

Human Values cannot be taught in a class room setting. To inculcate human values an individual must go out and get engaged with the community. By practically working in the field, an individual gets sensitized towards the social issues and problems. In this way individuals can learn their roles and responsibilities towards society and our Nation.

Patna University has a strong inclination towards instilling and inculcating human values among its students so that when they pass out they not only become outstanding professionals but also stand out as individuals with strong ethics and character. The idea is to transform an individual into a socially responsible being who is also a good citizen. Patna University is a small university, in which the staff and students share a relationship marked by bonding, sharing, affection and trust usually found in family.
